

Users Guide

One of the most important things to remember about our SpeedyShop website is that everything is on the same page. That is, the website is divided into five sections, and each section can flip over to show different information and interactivity. Here's how it looks like by default:

Customer

Although you can browse items without an account, they need an account to purchase items and add items to their cart. The login screen appears in the upper right-hand corner and looks like:
If you have an account, they simply login.

However, you do not have an account, click the “Don’t have an account?” text. Additional text boxes appear. Create your account right there!

Fill in your information for a new account. When you are done, hit “Sign Up” and you are instantly logged in, as seen below.

Welcome! Choose your favorite Username. You'll use this to enter the site.

The system will recognize you as a customer, employee, or an admin. Employees can switch to Customer view, and Admins can switch to both Employee and Customer views if they wish.

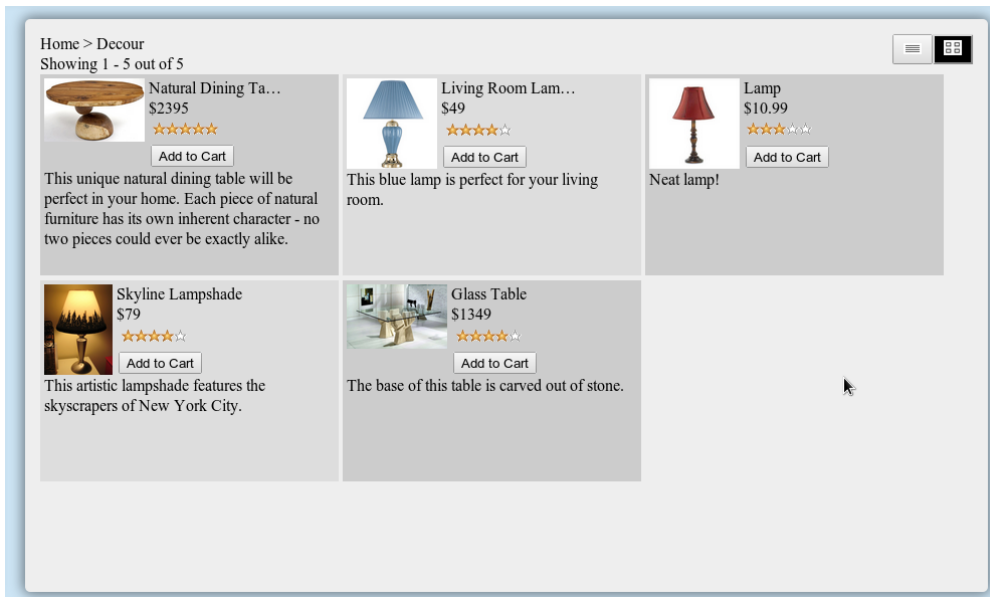

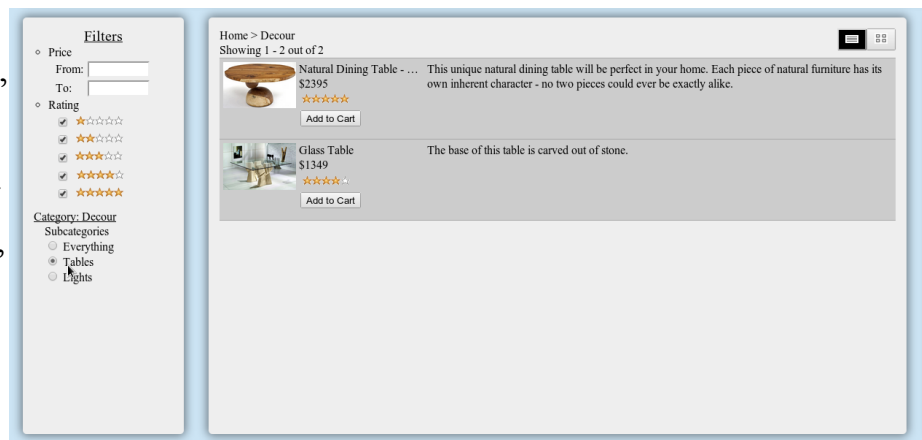

First, choose one of the categories. You will be shown all the items in that category.

Choose the “Hot Items” category to see the most popular items. The items are presented in descending order of popularity, and up to 30 will be listed.

Apply a filter to the list. Here, the “tables” subcategory is chosen, so out of all items in Home > Decour, only tables are shown. Each category has its own distinct subcategories to choose from. The “Price” and “Ratings” filter is common to all categories.

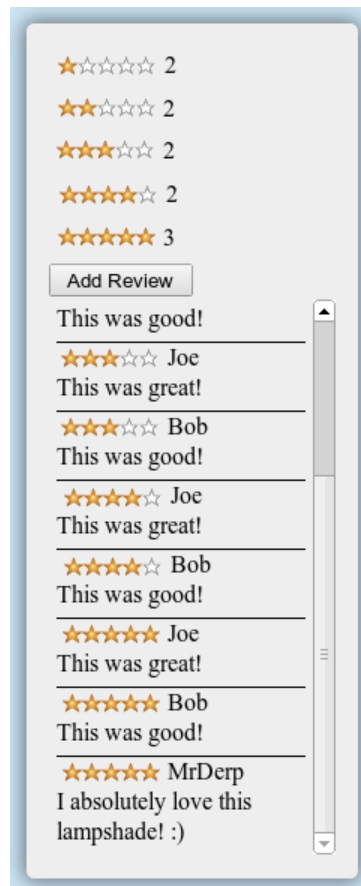

The item list can also be presented as blocks instead of a linear list. Use the two buttons in the upper right-hand corner of the center panel to switch between the views.

Click on an item for more detail.
The image becomes larger,
alternative images are presented,
and any reviews appear in the
module to the left.

Own the item and want to add a
review? Click the “Add Review”
button in the left panel. Enter
your name, your thoughts on the
product, and your rating. Then
hit “Submit Review”. If you
choose not to submit your
review, press “Cancel Review”.

Your review then appears
in the list of reviews.

This item hasn't yet been reviewed.

To purchase items in the Shopping Cart, click “Check Out”. Your list of items appears. Here you can enter item-specific promo codes, or more general promo codes, perhaps for certain categories. You are shown the subtotal, the discounts, and the resulting total. When you are satisfied with this cart, click the “Next” button in the lower right-hand corner of the center module. Alternatively, click the upper “Keep Shopping” button to return back to your item list.

Address

Notes

The next step is to enter billing information.

Shipping Info

Shipping Address
 (Same as billing ☐)

Then shipping.

Followed by payment information.
 (not fully implemented quite yet)

Payment Info

Please enter your payment information.

Employee

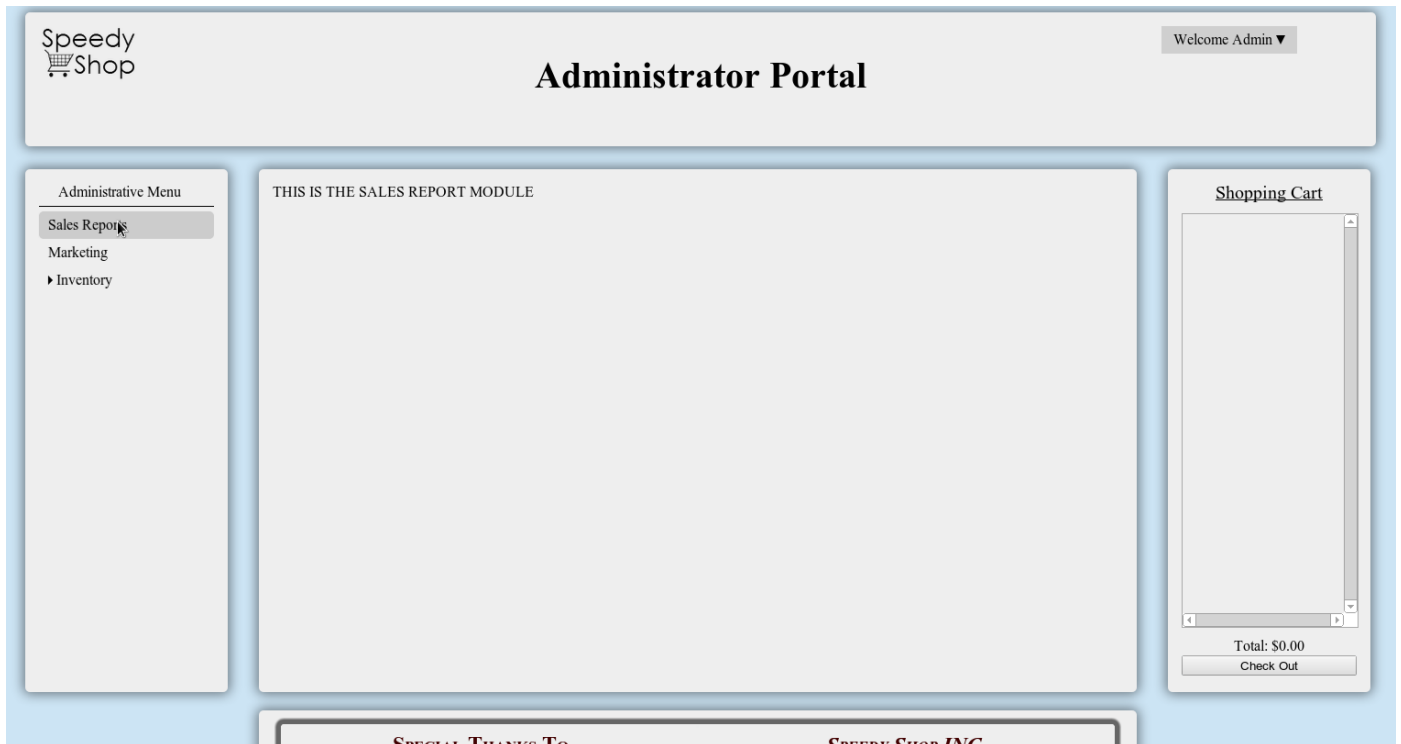

The main page of the Employee Portal. Here you can see a list of all processed orders. Note that any employee can use the drop-down menu in the upper right-hand corner to switch to Customer view and back again at will.

As an employee, you can switch to show the completed orders. This navigation is performed using the buttons at the top of the left module.

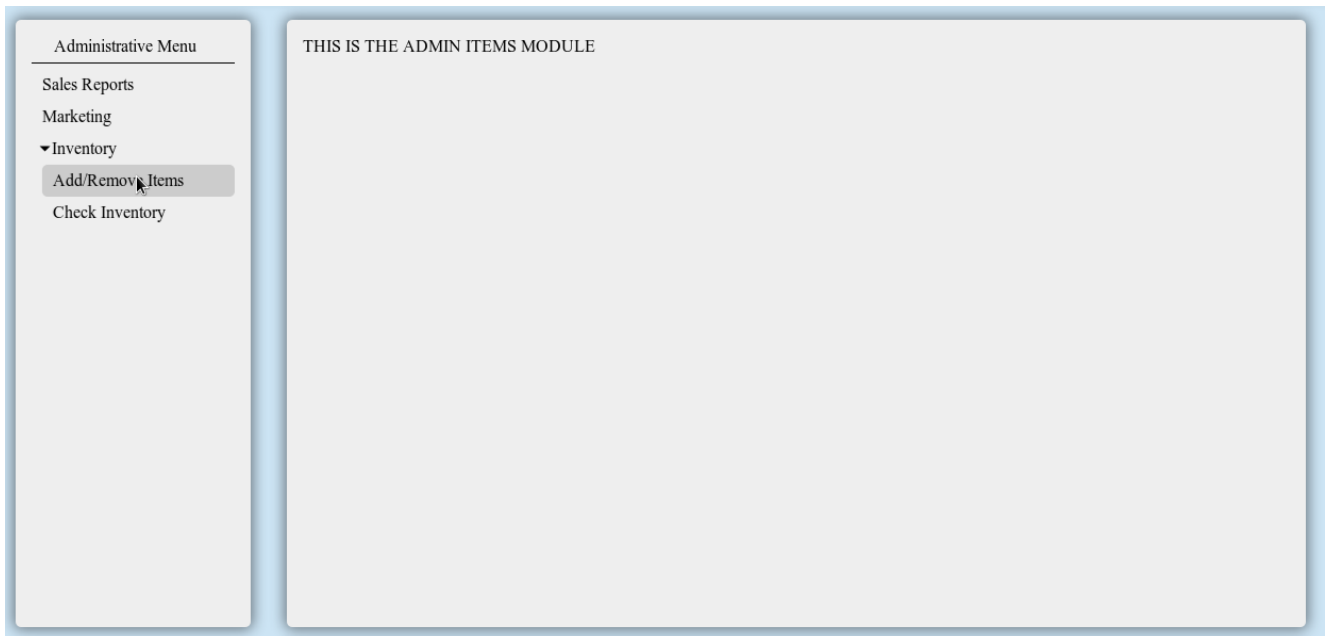

Admin

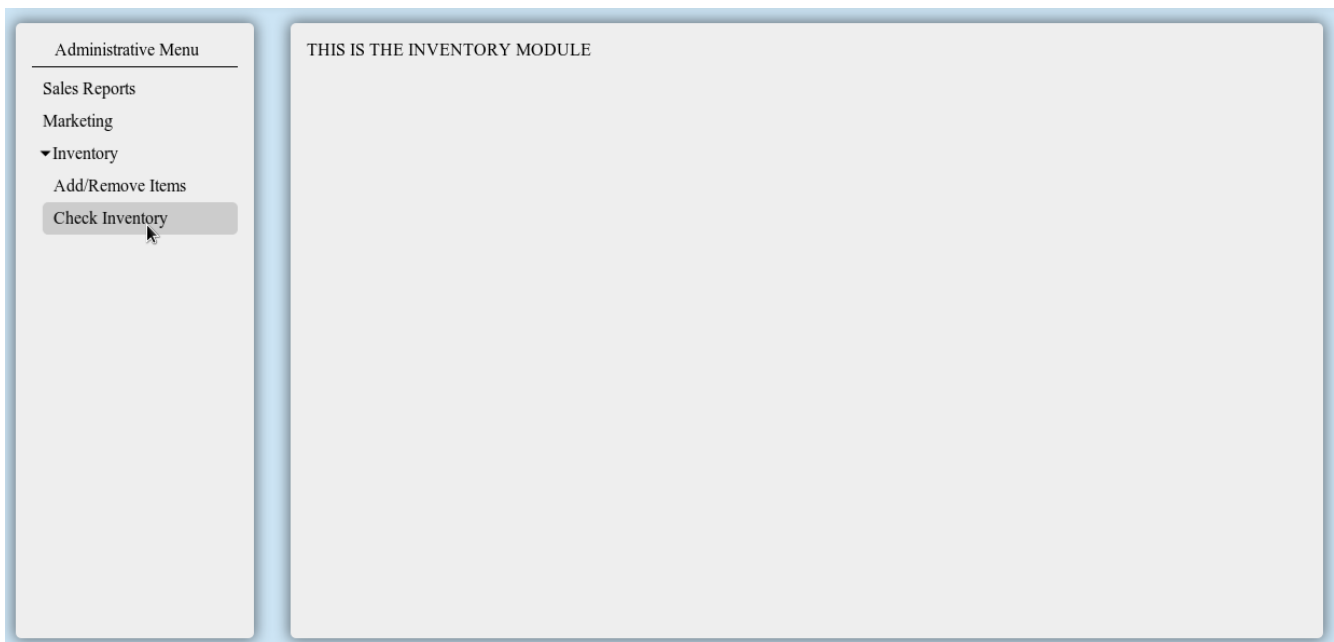

Main page for the Administrator Portal. As an admin, you can switch back and forth between all three views: Customer, Employee, and Admin. Thus you can manage all features in the site. Admins are first shown sales reports, which we will soon implement.

Use the menu system on the left-hand side to switch to the marketing view. This feature will soon be implemented.

As an admin, you can add and remove items from the inventory.
Choose this feature using the menu on the left-hand side.
This feature will be implemented soon.

Want to know what's for sale and how many of each item are in stock?
Use the inventory module to find out.
We will implement this feature soon.

Other websites just list names at the bottom. Not SpeedyShop.
Hover your mouse over the footer to see the credits.
